

Starforest Printing

Prices

**\$80/yd. with a 2 yd. minimum for first time orders.
Two or more people can be on one order.**

Calculating images per yard

When calculating how many images you can get on one yard, figure on 55" wide printing capacity. (Fabric is 60" wide and we can print 55" of that 60".)

Allow 1/2" space around all images so when you cut them apart you are left with 1/4" seam allowance beyond the edge of the picture (i.e. if you have an 8x10 picture, figure 8.5 x 10.5 for spacing calculations).

How to send files

- Send 300 dpi TIF images exported at the exact size required.
- Give each image a unique name.
- Put them on a CD readable by a PC (Windows).
- On a separate piece of paper print the image name and the exact size it is to be printed. Tell us how many of each image to print. It helps us if you send a color printout of what it is supposed to look like so we can check our color against yours.
- Put your name and contact info on every page.

NOTE: The PRINT SIZE should NOT include the 1/4" seam allowance - list the exact size of the actual image.

- Send the list, the color printouts and the CD to:

**Barbara Webster
1087 Caldwell Rd.
New Market, TN 37820**

If you have any more questions after reading this, don't hesitate to email. Make sure your TIFF files are 300 dpi and are in good focus. You can also use paintings and drawings, of course, or even computer-generated art. Our fabric is 100% cotton, soft, very white, easy to sew and quilt and the detail and color of the printing is phenomenal.

Allow 4 week turnaround.
